Challenger A WAY OF LIFE

TESTIMONIAL FROM A FAMILY

Marie and Alain are lovers of the finer things in life, who travel the roads for both business and pleasure: they create photo and video features of winemakers and other growers.

When we first met, we understood that we had the same outlook on motorhomes: That they were more than vehicles; they were an excellent way to discover new places, meet people, share experiences, try new things and to enjoy oneself!

As a result, we became partners as we follow and share the same values: When you travel with Challenger, you choose a unique way of life...

01 LIVING IN..

Marie and Alain tell us more :

“ We have tested the van and we loved how easy it was to use. It was also amazingly compact and modular without impacting comfort. It will be our choice of motorhome when the kids are older..”

DID YOU SAY MODULAR ?

Electric drop down bed that offers a garage for 2 bicycles, but also a very comfortable XXL bed ...!

GENERAL INFORMATION

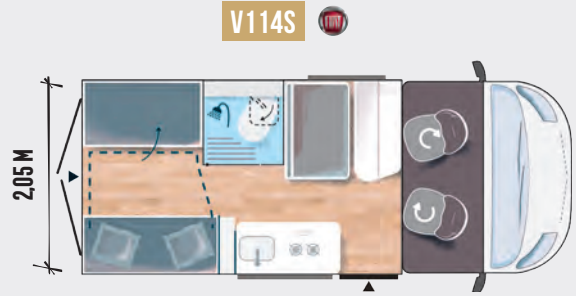

- The optional "towing" equipment can in certain cases change the number of passengers on the car registration papers. Your dealer will be able to give you more information.
- Mass in Running Order: the mass in running order includes the driver's weight (75 kg) in addition to 20 L (vans) / 1 L (motorhomes) of clean water, 90% fuel and 100% gas. The indicated masses in running order only take into account the equipment as standard upon leaving the factory. A difference of +/- 5% in the mass in running order is accepted by EU regulations. The manufacturer reserves the right to change the mass.
- You may be able to find certain heavy accessories like large blinds or generators in the marketplace. The weight of these accessories should be deducted from the payload and could possibly lead to a reduction in the actual passenger numbers. It is therefore important not to exceed the maximum loads on axles and the technically acceptable loaded weight when the vehicle is fully loaded.
- Clean water reservoir capacity (approved for our low profiles); capacity is 20 L (vans) / 1 L (motorhomes), must comply with regulations vis up to the user to adapt loads and the number of passengers to the vehicle's loaded weight. To do this, clean water reservoir capacity can be adjusted by the user to avoid reducing the number of passengers.
- Some models photographed in this catalogue may be shown with equipment supplied as an option. The characteristics of photographed models may vary from one country to the next. Despite the care taken in producing this catalogue, this cannot be viewed as a contractual document. Challenger reserves the right to modify its models without prior notice. Challenger cannot be held liable for any modifications made by its suppliers nor typographical errors when printing these documents. It is forbidden to reproduce, even partially, text or document. Do not litter the public highway.
- Your retailer is at your disposal to advise you and provide you with any additional information.
- Where there are multilingual versions, the French text is the binding version.
